Freelance Web Developer

02/2022 – present | Ahmedabad, India

Freelance

- Collaborated with clients to create responsive, user-friendly web applications, leveraging backend technologies such as Node.js, Express, and MongoDB. This initiative resulted in a **30% increase in website performance** and achieved a **98% client satisfaction rate**.
- Demonstrated strong attention to detail, leading to **zero post-launch critical issues**, extended **GUI functionality**, and **resolved bugs** in an enterprise-scale Angular design system.
- Worked closely with **UX designers**, contributed to **API integrations**, provided **technical assistance** across projects, **independently handled routine tasks** while maintaining **quality**, and managed **multiple tasks within changing constraints**.

Full Stack Developer

04/2023 – 07/2023 | Vadodara, India

Odyssey Solutions

Frontend Maintenance and Bug Fixes:

- Managed and enhanced **frontend components** of the **Cruise Booking Web Application**, using **Angular** within an **ASP.NET MVC framework**.
- Achieved a **25% reduction** in reported **bugs**, ensuring the smooth functioning of the result, landing, and details pages.
- Showcased proficiency in **JavaScript**, **Angular**, and **ASP.NET**, contributing to a more **user-friendly** and **responsive web application**.

Backend API Maintenance and Enhancements:

- Played a pivotal role in optimising the **backend API** for efficient **filtering** and **data communication** within the **Cruise Booking Web Application**.
- Collaborated on **Elastic Search integration**, resulting in a **30% reduction** in **data retrieval times**.
- Demonstrated expertise in **ASP.NET**, **API development**, and **SQL**, ensuring a streamlined data flow for the application.

PROJECTS

Cruise Booking Web Application (Frontend)

Angular Maintenance and Bug Fixes:

- Successfully maintained and improved frontend components of the Cruise Booking Web Application, ensuring a 25% reduction in reported bugs.

Key technologies: Angular, ASP.NET MVC, JavaScript.

Cruise Booking Web Application (Backend)

Backend API Enhancements:

- Contributed to the optimisation of the backend API, leading to a 30% reduction in data retrieval times.
- Integrated Elastic Search for efficient data processing.

Key technologies: ASP.NET, API development, SQL.

E-commerce Shopping App (MEAN Stack)

05/2024 – present

Shopping App (Ongoing Project)

- Developing an e-commerce platform using the MEAN stack (MongoDB, Express.js, Angular, and Node.js) for seamless browsing, shopping, and secure checkout.
- Responsibilities include designing backend APIs, creating responsive frontend interfaces, integrating MongoDB for data management, and implementing authentication and payment gateways.
- Achieved successful app presentation to the client.

EDUCATION

Bachelor of Computer Application

Ahmedabad, India

St. Xavier's College
